We protect what matters.

Who are Stericycle?

We are a world-leading business-to-business services company providing organisations - including schools, hospital laboratories and pharmaceutical manufacturers - with an array of essential and highly specialised compliance-based solutions, including specialist waste management.

We protect businesses by helping them compliantly manage the storage and disposal of all their risk and non-risk healthcare waste.

We have a proven track record in supporting local and national companies across the public and private sector and our infrastructure, experience, dedication to safety and compliance put us at the leading edge of Hazardous and healthcare waste management.

In addition, we provide other reliable services that protect your people, safeguard your reputation, improve your sustainability and ensure that your organisation remains compliant:

We protect businesses by helping them manage their live physical and electronic data, and securely destroying it when required.

What is the Hazardous & Biological Waste Management solution?

Any waste that is potentially harmful to the environment or to human health is classified as 'hazardous' under environmental legislation.

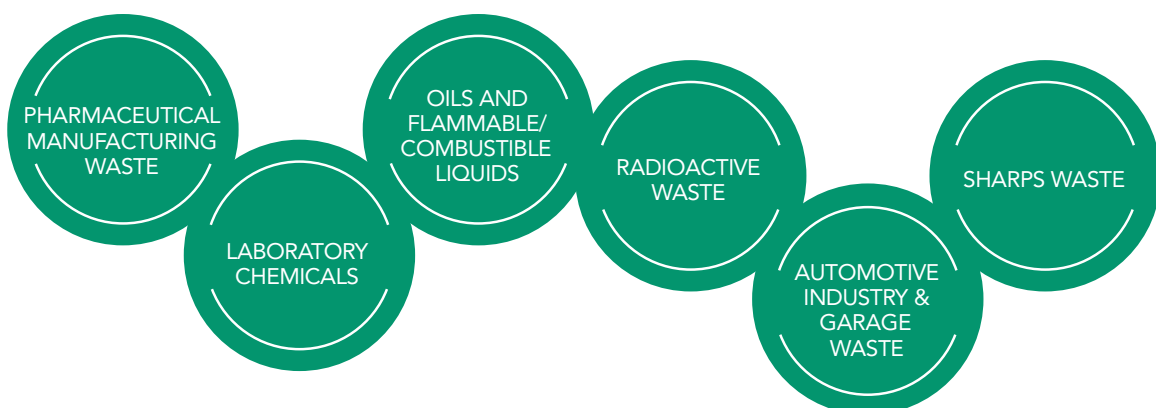

Hazardous waste is a term that covers many different waste types, all with their own management, segregation, transport, treatment and disposal requirements.

Stericycle delivers a comprehensive portfolio of environmentally responsible, flexible and cost-effective offerings to help customers with any hazardous waste management needs. Every customer need is addressed with expert staff, exceptional customer service, a firm commitment to compliance, state-of-the-art technology and infrastructure.

Regardless of scope, a commitment to the mission of providing innovative and sustainable solutions which protect people and safeguard the environment is always at the forefront.

Types of Hazardous Waste

Our specialised hazardous waste services include the collection and safe disposal or storage of:

Regulation and Compliance

Ensuring complete compliance with regulations, all our vehicles meet the requirements of the Carriage of Dangerous Goods by Road Regulations and all drivers hold current, valid HazChem licenses. Stericycle can provide UN approved containers & ADR Labels for IMR.

To ensure our services are delivered in full compliance with all applicable legislative requirements and best practice, Stericycle employs a team of formally qualified professionals who specialise in Environmental, Health & Safety, and Dangerous Goods.

Our specialists undertake formal audits against current legislative requirements to ensure that services provided are of the requisite quality. The team actively monitors developments in legislation and ensures that any changes which impact upon operations are fully understood and where appropriate enact change upon our Business Management System and ensure communication with our customers.

Stericycle's processes and procedures are regularly audited by external agencies and are formally accredited to the following standards:

ISO 9001:2015

ISO 14001:2015

OHSAS 18001:2007

Client Support

Facilitating a prompt and smooth service, Stericycle will assign a dedicated Account Manager. Our welcome pack will outline contact details for collection requests and will also consolidate all information produced during mobilisation including:

Contact details

Account numbers

Performance review meetings

Fully Traceable Waste

All waste will be tracked using SteriTrack. It captures and monitors all waste produced from a specific location to point of disposal. This level of detail ensures accurate reporting, invoicing, and continuous compliance with all regulations.

Every collection is given a unique job number/box number, on receipt to plant a barcode of that number is applied to each container for onward shipment/incineration, this approach ensures complete traceability from “cradle to grave” and facilitates production of a Certificate of Destruction.
