

# Dental practice checklist for handling waste to **ISO14001** standards

## Achieving and maintaining ISO14001 certification isn't easy - but it is important.

This checklist will help you to get the right processes in place and make sure everyone knows how to play their part.

### To meet ISO14001 standards for waste management, dental practices need the following:

- An initial waste audit
- A project plan
- A documented waste management policy
- Robust waste segregation processes
- Safe waste storage
- Waste records
- Emergency procedures
- Ongoing staff training & PPE
- Licensed specialist waste disposal services

Stericycle supports its customers with straightforward advice, support to implement best-practice waste management policies and practical end-to-end solutions.
